

GreenFORCE

Foster Research Excellence for Green Transition in the Western Balkans

Deliverable 5.5 – 2nd Report on Dissemination & Communication

Grant no: 101059411
Type of action: HORIZON Coordination and Support Action (CSA)
Project start date 01/07/2022
Project end date 30/06/2025
Cordis link <https://cordis.europa.eu/project/id/101059411>

Deliverable Information:

Deliverable leader	CEA
Lead Author	Igor Mitevski, Vesna Garvanlieva
Contributors	All beneficiaries
Contractual delivery date	30/06/2025
Delivery date	30/06/2025
Dissemination level	PU-Public

Version History:

Version	Date	Main author/s	Summary of changes
Vo.1	10/06/2025	CEA	Document creation
Vo.2	24/6/2025	Co-PLAN, POLITICO, CEA, Nordregio, UB- GEF	Inputs for the review of the draft Vo.1
Vo.3	26/6/2025	Co-PLAN, POLITICO, CEA, Nordregio, UB- GEF	Consolidate inputs

Quality Review:

Activity	Name	Date
Prepared	CEA	10/06/2025
Reviewed	Co-PLAN	20/06/2025

List of abbreviations used in this document

DCE: Dissemination, Communication, and Exploitation

EREA: European Research Executive Agency

GA: Grant agreement

KPIs: Key Performance Indicators

NGOs: Non-governmental organisations

PMB: Project Management Board

PC: Project Coordinator

R&I: Research and Innovation

WB: Western Balkan

WBC: Western Balkan Countries

WP: Work Package

Executive Summary

Deliverable D5.5 – 2nd Report on Communication and Dissemination is the report directly related to the outputs and outcomes stemming from the Dissemination, Communication and Exploitation activities of the project. This is a document for the use of all the partners involved in GreenFORCE project, designated as well as “public” regarding the dissemination level.

The deliverable is with a cut-off date close to 30/06/2025 covering the period from the end of second year of implementation of the project until the end of the project, however when appropriate the total 36-month period of project duration is covered as well. It intends to summarise in a concise manner communication and dissemination efforts during GreenFORCES’ implementation. Furthermore, the deliverable will provide insights for evaluation of the achievements of the dissemination and communication and effects of the project’s DCE Strategy.

1. Project overview

GreenFORCE aims at fostering excellence in the "Western Balkans' green transition" scientific research and innovation of Co-PLAN (Albania), CEA (North Macedonia), and UB-GEF (Serbia), as a means to enhancing their research profile, strengthening research and management capacities of their staff, and contributing to convergence between Western Balkans (WB) and EU research capacities, as well as to wider policy initiatives for the WB region.

This objective is reached through the twinning partnership of five organisations that will work closely to produce territorial knowledge through exploratory research and institutional learning; will transfer and exchange knowledge among partner organisations through applying the knowledge management cycle; and will engage in networking for sharing, cross-fertilizing and amplifying knowledge at the societal level. Ultimately, the ambition is to transcend from individual learning to enabling institutional learning, making sure that research and research management practices become institutionalised within the recipient organisations. GreenFORCE will contribute to the impacts of the destination "Improved access to excellence" by enabling pathways of cooperation, exchange, co-design, co-creation with academia, civil society and policy-makers at the regional level.

The 5 partner organisations are: Co-PLAN, Institute for Habitat Development in Albania as the coordinating partner; University of Belgrade - Faculty of Geography (UB-GEF) in Serbia and Center for Economic Analyses Association (CEA) in North Macedonia, as the two regional partners; and Nordregio, a pan-Nordic research organization based in Sweden, together with Politecnico di Torino, Italy (POLITO), as the leading EU research institutions. POLIS University in Albania is the affiliate partner of Co-PLAN.

2. Methodology & Scope of the report

The 2nd Report on communication, dissemination and exploitation (DCE) reflects on the tasks and activities implemented in within (1/7/2023-31/03/2025) of the GreenFORCE project within all Work Packages (WPs) and tasks incorporated in each of the WPs, however when appropriate and applicable the whole period of project implementation may be covered as well (1/7/2022-30/06/2025). The partners have jointly worked on creating the [Dissemination, Communication and Exploitation \(DCE\) Strategy](#), which is a publicly available document (Deliverable 5.1 update) and the partners have agreed on the implementation of the DCE Strategy in October 2022.

The DCE Strategy was revised in month 18 (December 2023) of the project's life time based on the information gathered the recommendations of the first report.

This report is focusing on the assessment of the activities conducted regarding the planned activities of the project during the past period, presenting them via the different tools and activities used their efficiency and effectiveness as well in communicating and disseminating the projects' messages.

The data and information summarized and reported are based on the collected reporting tools and templates that are needed for reporting by the contracting authority as well as the project's reporting and recording templates developed as part of the DCE strategy.

2.1. Scope and organization of the document

This Deliverable D5.5 presents a review of the activities carried out by the GreenFORCE consortium to communicate and disseminate the activities it developed during the life of the project and to raise awareness of the project itself and of the support. The document also provides information about the different initiatives aimed at exploitation of the project results.

Based on this overall scope, the document is organized in two main sections. The first section followed by the project summary overview, reflects the agreed outputs that the reports is referring to with the goals for effectively differentiating communication, dissemination and exploitation, as well as quantifies and explains the achievements and level of completion of the targets for the reporting period. Then, the dissemination and exploitation activities carried out per communication tool used are elaborated and presented in detail. In each of these sections a brief description of their objective and target audience/stakeholder and of the procedure to get access to the associated information is provided as well.

2.2. DCE targets & Achievements

The project has defined the targets and instruments for DCE, and the table below presents the achievement levels for the reporting period for the defined target.

Table 1. DCE instruments, target groups and measurable targets

DCE medium and means	General target groups	Measurable targets (and WP involved)	Level of completeness / Achievements
Project branding (logo and templates)	Project partners; Programme authorities; Policy makers; Business community; Academic sector and citizenships	Project logo design, and overall brand identity i.e.: colour palette, formatting (leaflet, brochure, rollup banner, press releases, policy articles, e-newsletter, etc.); project roll-up banner (5 in total/1 per country); 1000 brochures with infographics; 400 leaflets reaching at least 1000 recipients. (WP5)	Project branding identity markings – branding identity completed and used throughout the activities and tasks. E-Newsletter template developed – Newsletters No.1, No.2, No.3 No.4, No.5 and No.6 prepared and disseminated Rollup banner designed and printed (each partner has its own banner) 400 project factsheets prepared and disseminated 4500 brochures with infographics disseminated
Project website, referred as a	Project partners;		Website created and functional

primary source by social media	Programme authorities; Policy makers; Business community; Academic sector and citizenships	2000 page views per year, 6000 in total. (WP5)	Y1 web page views 3.192 Y2 web page views 4.160 Y3 web page views 4.023 (total web page views 11.375) Social media overall reach: 321.027; (Partners' social media channels 158.288; GreenFORCE social media channels reach: 162.789)
Social networks (Facebook, LinkedIn and Twitter, Instagram, YouTube and, Researchgate)	Policy makers; Stakeholders; Academic sector	Over 700 followers; at least 1 post per week on social media networks (FB, twitter, LinkedIn or IG). (WP5)	Followers (30/06/2025): -Tweeter 28 followers - FB 195 followers -Instagram 319 followers -Linked in: 445 followers (total followers 987) Weekly posts uploaded – up to 132 on each social media project channel (30/06/2025) Website posts: >60
E-newsletter (connected to weblog) informing experts on project deliverables/results useful for other practitioners	Policy makers; Stakeholders	1000 recipients; Published 2 times per year; 6 times in 3 years. (WP5)	Newsletter 1: 71 subscribers (sent invitation for subscription to over 600 via email) Newsletter 2: 255 subscribers (post on social media for visibility and additional subscriptions) Newsletter 3: 264 subscribers (post on social media for visibility and additional subscriptions) Newsletter 4: 290 subscribers (post on social media for visibility and additional subscriptions) Newsletter 5: 293 subscribers (post on social media for visibility and additional subscriptions) Newsletter 6: 357 subscribers (post on social media for visibility and additional subscriptions)
Media-releases: articles in newspapers, magazines, impact on radio or TV	General public	Drafting press releases for national TVs and other web-portals, at least twice a year by each WB partner. (WP5)	Press release prepared for 1 st Conference in Belgrade Press release prepared for Summer schools (Polito) in Turin Press release prepared for the final conference in Tirana, Albania General media appearance for the Green FORCE project (Albania)
Scientific conferences	Academic sector and practitioners	2 international scientific conferences in the WB organised by the WB partner universities, at least 200 recipients; One final event at least 50 recipients; One workshop on “green transition in the WB” at the EWRC; Contribution to or co-organisation of regional	<ul style="list-style-type: none"> ○ 1st Conference in Belgrade, in June 2023, organized by partner UB-GEF, 189 participants ○ RSA Special Session for WB, in June 2023: <ul style="list-style-type: none"> -3 papers from the partners, participants and researchers of GreenFORCE; -special session participants: 11; ○ -promoted project at RSA international ambassador meeting (~60 participants) Contribution to the 2023 annual Tg-WeB workshop: <ul style="list-style-type: none"> -Participants: 12 physical + ~20 online ○ Organization of Roundtable on 'Just green transition' at the AESOP Conference, 25-29 July 2022 in Tartu, Estonia <ul style="list-style-type: none"> - Panellists in roundtable: 5 persons - Participants: 15 persons

		events with RCC, NALAS and TG-WeB. (WP2, WP4, WP5)	<ul style="list-style-type: none"> o Participation and presenting the concept of 'just green transition' at the National Forum on Climate Change, organized within the Green-AL project, led by Co-PLAN. o Participated on the EWRC workshop on "green transition in the WB", Brussels, October, 2024 o Presentation in the Annual Congress of AESOP, in Lodz Poland, from POLITO on Just Green Transition practices o Roundtable organisation at the AESOP Annual Conference 2024 in Paris, France o Organisation of the Special Session during the RSA Annual Congress 2025 in Porto, Portugal o Attended the Nordregio Forum 2023 event in Iceland entitled "Young Nordics: The key to a prosperous and green region"; Attended the 2023 Nordic Council of Ministers Cross-Thematic Group Meetings in Iceland which introduced project partners to the Nordic Council of Ministers structures, and engaged in discussions on current and future policy focus of thematic groups. o Attended the 2024 Nordregio Forum entitled "Nordics Turning Green: Elevating the Nordic green transition to create more attractive and competitive cities and regions" which focused on green transition in the Nordics and explores ways to make the Nordic regions world leaders not just in renewable tech and greener supply chains but in living sustainably as well. o Participating with Paper at the AESOP Congress 2025 (forthcoming in 9th of July) o Organisation of the GreenFORCE Final Event in Tirana (over 73 people attending)
Annual meeting	Project partners; Programme authorities; Policy makers; Business community; Academic sector and citizenships	At least one annual meeting of TG-WeB. (WP4, WP5)	TG-Web annual meeting 2023, in Skopje, May 2023, ~30 participants online & physical presence, including partners TG-Web annual meeting 2023, in Sofia, May 2024, ~30 participants online & physical presence, including partners TG Web Partners, participating at UNECE 2024 Regional Forum - "Halfway to SDGs Implementation: the Balkans Perspectives" Side Event
Policy briefs/reports	Project partners; Policy makers	5 policy briefs published in journals (WP2, WP5)	5 policy briefs prepared and published in GreenFORCE Web, disseminated through GF newsletter as well as circulated among country policy makers (translated versions as well)
Open lectures	Project partners; Academic sector	1 per University/per teaching event 3 in total. (WP3, WP5)	Teaching events at POLIS University of: -POLITO:2 weeks in May 2023 with 35 students. -UB-GEF and CEA: In March 2023 with 26 participants. - Spatial Planning in Albania (Ledio Allkja Turin - 53 participants - Disaster risk management and climate change adaptation financing (Ogerta Gijknuri) Turin – 61 participants - Social Environmental Cost-Benefit Analysis (Merita Tosks Turin – 60 participants

			<p>Spatial Planning in Albania (Ledio Allkja Turin – 53 participants)</p> <ul style="list-style-type: none"> - Seminar: EU Integration Path in the Western Balkans Speakers: Berisha, Jano, Bejko, Simic Turin – 18 participants - Collaborative Research and Institutional Twinning: meeting with SDG11 Lab , R3C and FULL Turin – 10 participants - POLITO to UB-GEF: May 2024 (Erblin Berisha, Giancarlo Cotella, Andrea Ajmar, Giulio Tonolo)
Large dissemination Events	Project partners; Programme authorities; Policy makers; Business community; Academic sector and citizenships	3 large dissemination events (up to 250 participants). (WP5)	<ul style="list-style-type: none"> -Belgrade Conferences June 2023, 189 participants -Panel in 22nd European Week of Regions – 104 participants -Final closing event Tirana - 73 Participants
Final dissemination event	Project partners; Programme authorities; Policy makers; Business community; Academic sector and citizenships	At least 50 participants. (WP5)	Completed –73 participants held in Tirana, June 2025
Open-access publications in Scientific journals	Academic sector; Policy makers; Stakeholders	Drafting and submitting for publication 3 joint scientific papers based on the research of WP4, and at least 1 paper per WB organisation, focusing on own country (WP3,WP5)	<p>Open access to the outputs: uploaded on Zenodo (https://rb.gy/iq8em) & GERY (https://gery.gef.bg.ac.rs/handle/123456789/1385)</p> <p>Submitted papers for special issues in Europa XXI (second preview in progress), Chapters in Handbook</p>
Open-access book	Project partners; Programme authorities; Policy makers; Business community; Academic sector and citizenships	Drafting the content for 1 edited open-access book (WP3)	<p>Content drafted, proposal prepared & sent, to Palgrave MacMillan, 4 parts, 27 chapters.</p> <p>. The handbook can be pre-ordered: The Palgrave Handbook of Just Green Transitions in the Western Balkans and Beyond: Berisha, Erblin, Moodie, John, Allkja, Ledio, Jeftić, Marija: 9783031950742: Amazon.com: Books</p>

2.3. Target Groups

Dissemination tools do take into consideration the stakeholder groups difference when necessary/appropriate.

Figure 1. The target groups of GreenFORCE

The main groups of stakeholders or target audiences for the GreenFORCE’s communication, dissemination and exploitation activities are:

- Core group of 29 researchers from the consortium – (17 from the WB partners & 12 from the EU partners);
- Researchers connected to, but not directly linked to GreenFORCE however interacting with the project.
- Societal actors directly benefiting from dissemination, exploitation and networking: a) students and scientists - from the WB; b) policy makers and other societal actors related to green transition CSOs and industries,
- Society at large.

The tables below present the participation of different stakeholders in each event with a total reach of 642 participants in the first year of project implementation, total reach of 783 for the second year and 658 for the third year (total > 2,000). The distribution of reached target group is presented in the figure following, indicating the coverage by target group. The distribution indicates that the most informed audience have been the researchers and students within the consortium with over 50% of the audience.

3. Communication tools

Initial information for announcing the project initiation was disseminated through the Partners' dissemination channels and their communication tools. These are still being used for wider dissemination, easier communication and higher engagement.

The main communication tools of the project, which were developed and are currently being used, are: 1) The project website; 2) Its Social media accounts; 3) The bi-annual e-newsletter.

3.1. Project website

The project website is the **main media hub** of the project and primary source for feeding its social media as well. The website informs on:

- the project partners and the activities (in all WPs);

Funded by the
European Union

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or European Research Executive Agency (REA). Neither the European Union nor the granting authority can be held responsible for them.

- provides resources and methodologies;
- enables policy and societal communication;

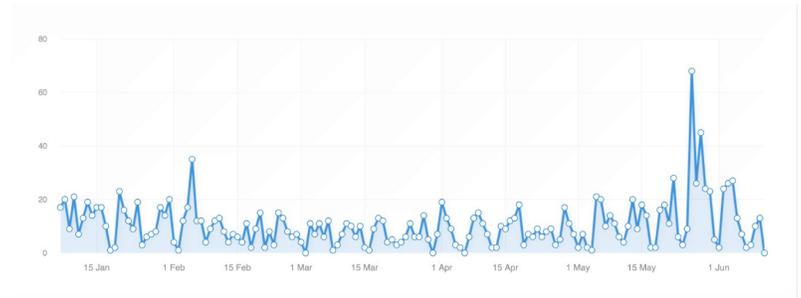

It contains information on the products of the project, including the deliverables. Of which, all deliverables open for the public are easily accessible. The site also provides link to the twinning partners websites for local access and more resources on green transition, and to science repositories.

The official GreenFORCE website <https://greenforcetwining.net/> is fully functional and accessible as of October 31, 2022.

Figure 3. Project Website

Figure 4. Posts Overview

Period	1/07/2023-30/06/2025	
Sessions		4,979
Page views		10,614
Total users		3,058

3.2. Social media

In addition to the project website, GreenFORCE uses different social media¹ for distributing information related to our project and for engaging both target groups and the wider public. Facebook, Instagram, Twitter/X, LinkedIn and YouTube accounts are the media channels used to inform and communicate/disseminate project related information/news.

3.3. E-newsletters

A biannual newsletter is issued to ensure that all stakeholders are regularly updated on the project’s developments. It has been circulated via the project’s mailing list but also via all partners’ media platforms as links. Each project partner contributed to the content of the newsletter, as it feeds its content mainly from website articles.

The e-newsletter has been shared by the project account to reach those recipients that have had an interaction with the project such as stakeholders identified, participants in the co-design workshops, etc. which have provided their consent and also with the subscribers from the website.

Furthermore, the partners shared the newsletters with other interested stakeholders within their own network that are interested on the subject and asked for their subscription for future notification.

All newsletters are also available and accessible at any time via the website on the following link <https://greenforcetwinning.net/newsletter/>.

3.6. Internal communication

3.6.1. Trello platform

Trello platform is used for effective overall project management, coordination of the work between project participants, document management and communication between partners.

Communication within the consortium takes place mostly online, through e-meetings, e-mails and the Trello platform. The use of Trello is necessary for guaranteeing the timely archiving of any kind of outputs related to the implementation of the project at any level, from sub-tasks to deliverables.

Figure 19. GreenFORCE board on Trello platform - snapshot

3.6.2. PMB monthly meetings

In order to update each other on the activities conducted, in progress and planned, regular monthly PMB meetings have taken place. Each monthly meeting is open for every project partner and researcher and it includes presentations of progress per each WP and tasks included in them as well as other issues related to organization, monitoring and managerial questions.

Each monthly meeting organization commences with the preparation of the agenda, where every partner contributes with possible issues to be further addressed, and each meeting is followed by the minutes of the meeting. Each of these are transparently available on our joint Trello platform account. For example the link to one of the PMB documents is <https://trello.com/c/AtgQboJY>.

Besides online, when there is possibility and as planned, the PMB meetings are also organized face-to-face and in synergy with other activities conducted on-the spot.

Additional coordination meetings are held for specific activities//tasks between all and some partners and researchers – this is conducted on a needs basis in a bilateral and multilateral level.

4. Dissemination and exploitation activities

Numerous and different activities were foreseen and conducted to disseminate project results. The activities conducted have been documented in an appropriate table, supported with additional documents as evidence.

The organizers of each event provide a full information package to the participants including draft agenda, letter of invitation and a note on the logistics. Each event is documented: news/event review, agenda, list of participants/trainees, report, gallery, presentations (upon the approval of the presenter), video materials (upon approval of participants).

4.1. Final Closing Event

During the final event of the GreenFORCE project, a comprehensive overview of the project's achievements and insights was presented and discussed. The collaborative efforts over three years were highlighted, including the involvement of over 200 stakeholders from academia, civil society, public institutions, and the private sector, all working towards an inclusive and sustainable regional transition.

The keynote speakers underscored the EU's commitment to supporting regional green initiatives and the importance of cross-border cooperation, as well as the regional opportunities and challenges related to sustainable development and urban transitions, emphasizing the role of innovative planning and governance. The presentation of project results covered the five regional case studies conducted during the initiative. These studies explored critical green transition issues such as decarbonization, climate adaptation, sustainable mobility, and energy efficiency. Participants discussed the identification of macro-regional cooperation opportunities, including cross-border knowledge exchange, multi-stakeholder collaboration, and the promotion of inclusive governance models and the importance of regional networks was emphasized as vital for maintaining momentum despite political shifts.

The event included three panels that delved into the opportunities, challenges, and policy pathways for advancing the green transition in the Western Balkans. Panellists provided insights into regional strategies, funding mechanisms, and governance frameworks necessary to support sustainable development.

Figure 21. GreenFORCE Final Event, Tirana

4.2. Local meetings for mapping and engagement

These meetings are directly linked to WP4 as well as with WP5 to support the participatory mapping, engaging local stakeholders and communities to reveal local knowledge in each WB territory to provide two-way communication, through which information about the project is disseminated, and information for implementation of activities

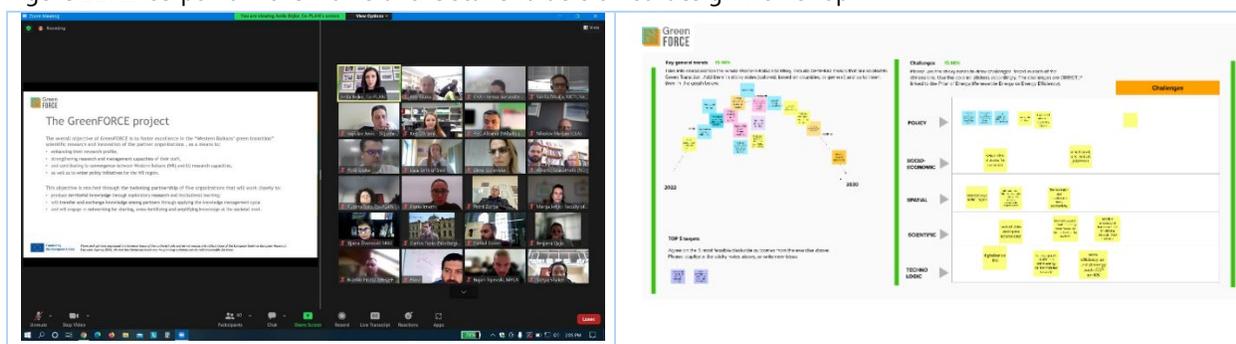

The initial round of two Co-Design Workshops (held online, November 2022) on the Conceptualization of the Green Transition in the Western Balkan were attended by total of cumulatively 73 participants including the project partners but other stakeholders as well, with different backgrounds including: policy makers, CSOs, international organizations, scientists and researchers within and outside the consortium.

Figure 22. Excerpt from the works of the stakeholders on co-design workshop

The second round of Co-Design workshops was held on November 13, 2024, on the theme “Implementing the Green Agenda for the Western Balkans: How do we measure achievements in Green Transition?”.

Held online, the workshop brought together around 40 participants from the quadruple helix stakeholders, including academia, civil society, public institutions, and the private sector. The event was marked by dynamic discussions and insightful contributions from key experts, offering diverse perspectives on the governance challenges and opportunities in the region’s green transition, and more importantly followed by an interactive exchange on possible performance indicators needed to be accounted of when talking about transition in the Western Balkans.

Table 12. Local meetings for mapping and engagement in the WB countries

<p>CEA – North Macedonia</p>	<p>Meeting with Ministry of Environment (several times), Meeting with Regional Development Bureau, Local Self Government Municipality of Kichevo, Ministry for Economy, Ministry for Labour and Social Policy, Delegation of EU in North Macedonia, Other stakeholders and interested parties, OECD, researchers in the region, NGOs, EBRD, Academia, etc.)</p>
<p>UB-GEF – Serbia</p>	<p>Meetings with City of Kragujevac, Chamber of Commerce and Industry of Serbia, UNDP Serbia, UNDP B&H, Delegation of the European Union to Serbia, Ministry of European Integration of RS, Ministry of Environmental Protection, of Science of RS,</p>

	Ministry of Technological Development and Innovation of RS, Ministry of Construction, Transport and Infrastructure of RS, Embassy of Sweden in Serbia, Regional Cooperation Council, AEBR centre for Balkans, NGOs, Numerous Companies etc.
COPLAN - Albania	Meeting with Director of Tourism at Ministry of Tourism and Environment; Director and representative from National Territorial Planning Agency; Albanian Network of Researchers; Policy Answers Horizon Europe project; Municipality of Tirana; Agency for Energy Efficiency; etc.
Nordregio - Local Meeting with stakeholders from North Macedonia, Albania and Serbia	Nordregio conducted series of Local Meeting with interviews and focus group discussions with stakeholders from North Macedonia, Serbia and Albania regarding the macro regional collaboration in the frame of just green transition.

GreenFORCE has a research advisory board (RAB), composed of 6 prominent researchers and the first 1st RAB meeting took place in Tirana between March 31st – April 1st, 2023. Second RAB meeting took place in Belgrade plus online on 17.05.2024 and the third RAB meeting took place in Durres on 16.05.2025. RAB meetings although envisaged as having an advisory function, never the less have the role to also disseminate and communicate the project's activity to a wider audience.

4.3. Open-access scientific publications in high-rated journals

The publications prepared in the course of the previous period are freely and openly available via online repositories: 1) ZENODO, 2) GERY.

Deliverable 4.5_1st Research Study Report; and Deliverable 4.6_2nd Research Study Report	https://gery.gef.bg.ac.rs/handle/123456789/1766

Open-access publications are especially emphasized in the overall project idea. Academics, policy makers and all stakeholders could access them without any financial, legal or technical barriers, and in that way use project research and results.

The GreenFORCE website <https://greenforcetwining.net/> in the section [Results and Deliverables](#) as well in [Publications](#) include and will include articles summarizing the scientific publications and will be submitted to CORDIS Wire.

4.4. Policy briefs

Policy briefs and recommendations are part of WP₂, led by the partner Nordregio, is aimed at targeting mainly policy-makers and practitioners. The Policy briefs are intended as short documents presenting the research results in more approachable language and picking a few policy-relevant messages to be disseminated in cooperation with other project partners, to selected groups of recipients in each WB territory.

All 5 Policy briefs are published as planned. The first series focused on transition fatigue and is based on the findings of the deliverable 4.1 Conceptualization report and the mapping of green transition in the WB countries. The second one focuses on alternative fuels with focus on Albania. The second series of the policy briefs were based on the two case studies in WP₄ for North Macedonia and Serbia as well as the macroregional approach for collaboration.

All publications can be found here <https://greenforcetwinning.net/publications/>

Building effective governance structures, anchored in the local realities, is vital to deliver just energy transition. Identifying and implementing good practices around local stakeholder engagement is an essential precondition for devising place-based policy measures that address the possible impacts of energy transitions on different social groups and across regional territories in a country.

This policy brief examines energy transition policies and the extent to which governance and stakeholder engagement processes can deliver policies and outcomes which are socially and spatially just. The case of the Republic of North Macedonia (RMN) is used as an example to uncover the governance challenges associated with decarbonisation and

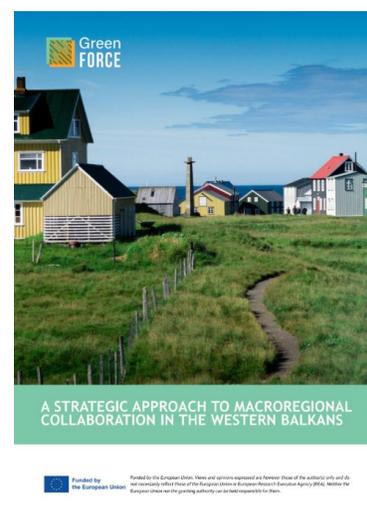

the just energy transition. Although the subject is complex and cannot be directly transposed to other places, the experience of the RMN provides lessons relevant to other countries in the Western Balkan (WB) region and beyond with shared just energy transition challenges.

Recommendations aim to support policymakers in making informed decisions for improving energy transition governance structures and stakeholder engagement processes. They also contribute towards highlighting the relevant responsibilities of different stakeholder groups in delivering energy transitions, including public authorities, industry and sectoral experts, businesses, NGOs and civil society groups, and local communities.

Public transport and active mobility are one of the key elements of urban mobility transitions. These means offer higher energy efficiency and lower CO₂ emissions per passenger-kilometre compared to private cars. A step-by-step transition to a carbon-free transport system requires, in addition to incentivising sustainable urban planning, a comprehensive set of transport policies, including expanding and improving public transport, promoting walking and cycling, and accelerating the adoption of electric and other low-emission vehicles. Additional measures include enforcing stricter parking regulations and introducing road pricing to reduce car dependency. These policies help create a more sustainable and accessible urban mobility system.

This policy brief examines potential improvements to sustainable cleanliness in the City of Kragujevac, Serbia, focusing on solutions with near-term, practical effects that are especially easy and cost-effective to implement. The insights drawn from Kragujevac could be applied to other medium-sized cities in the Western Balkans and beyond. The recommendations are intended to assist policymakers, urban transport experts and urban planners, and other professionals within the local public administrations in making informed decisions that will advance the transition to green and inclusive mobility. Additionally, the brief emphasizes the crucial role of citizens as key stakeholders, highlighting their views gathered through a survey on the quality of public transport and its governance in Kragujevac, offering essential insights into local needs and expectations for future mobility solutions.

Funded by the European Union

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or European Research Executive Agency (REA). Neither the European Union nor the granting authority can be held responsible for them.

4.5. Participation in external events, scientific congresses and conferences

The events, international conferences, congresses, workshops, exhibitions and fairs are one of the most important parts of the dissemination and communication strategy because they allow to connect with stakeholders and the general public, encourage networking and show advances and results of the project. Events also feed of content the communication channels and tools (website, Social Media, press releases) generating great impacts on different audiences.

Each partner is encouraged to attend as many external events related to Green Transition and/or its dimensions as far as possible and at least once during the project duration. It is important to keep the presence of the project in Science, Research and Innovation events that are organized in the WBCs, even after the completion of the project.

All partners: TGWEB 2023 – network annual meeting covered the subject of green transition on territorial development and the project activities, TGWEB 2024 -7th annual meeting on the subject of integrating Sustainable Development Goals (SDGs).

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or European Research Executive Agency (REA). Neither the European Union nor the granting authority can be held responsible for them.

All partners: RSA 2023 Conference participation on a special session for the Western Balkan organized by the project team; RSA2025 Annual Conference 2025 in Porto under the theme “Navigating Regional Transformation” involved in Session SS79, titled “Resilient Responses in the Territorial Governance of Just Green Transitions”

All partners: Conference GREEN AGENDA FOR WESTERN BALKANS Belgrade - Special session was dedicated to GreenFORCE co-moderated by Nordregio and Polito. GreenFORCE participated on the 22nd edition of the European Week of Regions, Brussels, October 2024 by co-hosting session on “Multilevel Governance: Empowering Stakeholders in the Climate and Energy Transition”, highlighting how local and regional governments are driving the transition towards a just and sustainable future.

July 2024, GreenFORCE was present on the 36th AESOP Congress in Paris besides presentations, the team organized roundtable discussion centered on the theme “Just Green Transitions: Transforming or Transitioning to What?”

Within Tirana Architecture Week 2024, GreenFORCE organized a roundtable discussion titled “Challenges in Achieving Net-Zero Transition in Post-Communist Urban Neighbourhoods.”

EWRC, Brussels, October 2024, project partners participated and co-hosted a merged session with the Convenient of Mayors on “Multilevel Governance: Empowering stakeholders in the Climate and Energy Transition”.

Co-PLAN, CEA and Nordregio: As part of the Green-AL project, led by Co-PLAN, partners by and CEA took part in National Forum on Climate Change in Albania.

CEA: Online participation of event Green transition conference by environmental NGO network in Macedonia; Participated on a World bank event in Skopje on the regional WB economic outlook which included the aspects of carbon emission mechanism. CEA was present on the event for presenting North Macedonia—Country Climate and Development Report as well as North Macedonia Climate - Public Finance Review of the World Bank.

Co-PLAN organized a roundtable on Just Green Transition in the framework of the ‘AESOP Congress 2022 Space for Species: Redefining Spatial Justice’, organized in Tartu, Estonia, on 25-29 July 2022. The roundtable, titled “Fit for Green – Social and Territorial Impact of Just Green Transition” brought together esteemed academics and experts to discuss on regional specificities of green transition, and the impact to vulnerable communities.

4.6. Dissemination and exploitation through partners’ networking resources

In addition to the dissemination tools of each partner’s organisation, GreenFORCE has also well-established dissemination networks through each partner. Partners take into consideration all tools and established relations in the process of dissemination and exploitation and each partner is encouraged to promote, disseminate and exploit the project accordingly with their own networks.

Among the other activities, the partners worked towards joint proposals for regional partnership of exploiting the project results into new project proposals, and creation of macroregional partnerships.

5. Monitoring and Evaluation

The progress reports which are part of WP1, as well as the impact measurement and evaluation activities which are also part of WP1, foresee monitoring of all Key Performance Indicators, including the key indicators on communication, dissemination, public engagement and awareness-raising. These activities specifically monitor the progress made against the indicators set in the DCE strategy.

Table 15. KPI achievements of dissemination and communication

KPI of Dissemination and Communication	Target	Achievement to date (Y1)
Prepared branded templates for project memorandum, power point presentation, reports and media posts	Branded templates for the variety of products	Prepared and used Status: completed
Project roll-up banner per country (5 in total)	Roll-up banner designed and printed	5/5 prepared and used Status: completed
400 project leaflets per country/in total		400 leaflets printed on project factsheet Status: completed
2000 website views per year	2000 website visits per year	Status: fully achieved
700 followers on social networks	700 followers	Total FB, Instagram, LinkedIn followers: 987 Status: completed
at least one post per week on each social network (52 posts per year on each social network)	52 per year	Weekly posts uploaded – up to 132 on each social media project channel (30/06/2025) Website posts: >60
Distributed e-newsletter 2 times per year (6 in total) through over 1000 – reached	1000 reached	Target reached
At least 3 local meetings per WB territory (6 in total)	6 meetings	Completed
200 stakeholders participating in 4 workshops for co-design	4 co-design workshops	Completed
Drafting and submitting for publication 6 joint scientific papers	6 scientific paper	Status: completed pending publication
3 open dissemination events including live streaming up to 250 participants,		Target achieved 189 participants in Belgrade Conference Green Agenda for WB 60 participants on the final event in Tirana Panel in 22nd European Week of Regions – 104 participants 15 Participants on the TAW roundtable
One open-access book application		Completed
2-3 external participation GreenFORCE will be communicated		Completed

6. Conclusion

- The most numbered audience during the project duration regarding the activities for dissemination and communication events including meetings, workshops, lectures, conferences, teaching activities etc., are generating audience from different target groups. The participants dominating by number (participants) are for the larger part researchers, both within the consortium however beyond and outside the consortium as well, and also students.
- The society at large presented via the general public in the WB region is also a relevant and important target group which is reached more robustly via the communication tools: meetings and web posts plus social media posts. All these communication tools record respectable coverage even beyond the initial plans, thus it is an effective method that should be continued with the equal intensity for future follow up activities and joint efforts. The general public reach from partners' social media beyond the project specific social media channels is also an effective outreach for even wider public and should be thus continued as a method for engaging wider audience for both follow up activities, joint future activities and collaboration and individual partner activities on the subject.
- Most effective communication tool/social media channel of the GreenFORCE project are by far Facebook and Instagram, as most effective in reaching wide audience thus the project should continue to focus on these in the future as preferred. The LinkedIn profile reach indicates reasonable reach as well and should be kept as well as it reaches diverse target group to a more professional audience rather than wide public.
- International conferences were effective for direct mass reach for different audiences, nevertheless predominantly for the scientific and specialized audience.
